

Measurement Data Wireless Communication System

Mitutoyo

U-WAVE

IDA standard license No.N0259-10

Measurement data can be input to a standard software package.

U-WAVE-R loads data received from U-WAVE-T on to a PC software package via a USB port.

Features

- Easy data loading to standard software package.
- Data communication range up to 20 metres.
- Substantial cost reduction compared with similar conventional U-WAVE models!
