Portable Surface Roughness Tester

SURFTEST SJ-210 Series

A small, lightweight, and extremely easy to use surface roughness measurement instrument that lets you view surface roughness waveforms right there on the color LCD screen.
The Surftest SJ-210 is a user-friendly surface roughness measurement instrument designed as a handheld tool that can be carried with you and used on-site.

### Easy to use

**2.4-inch color graphic LCD with backlight**
The color LCD provides excellent readability and an intuitive display that’s easy to negotiate. The LCD also includes a backlight for improved visibility in dark environments.

**Simple key layout**
The Surftest SJ-210 can be operated easily using the keys on the front of the unit and under the sliding cover.

### Highly functional

**Advanced data storage capabilities**
Up to 10 measurement conditions and one measured profile can be stored in the internal memory.

**Optional memory card**
An optional memory card can be used as an extended memory to store large quantities of measured profiles and conditions.

**Password protection**
Access to each feature can be password-protected, which prevents unintended operations and allows you to protect your settings.

**Multilingual support**
The display interface supports 16 languages, which can be freely switched.

**Stylus alarm** (patent pending in Japan)
An alarm warns you when the cumulative measurement distance exceeds a preset limit.

### Extensive analysis and display features

**Complies with many industry standards**

**Displays assessed profiles and graphical data**
In addition to calculation results, the Surftest SJ-210 can display sectional calculation results and assessed profiles, load curves, and amplitude distribution curves.
High-speed USB communication

Data can be transferred to and from a computer via the high-speed USB interface.

Battery

The battery charges in one quarter the time of previous Mitutoyo products.

Applicable standards

In addition to JIS and ISO, the Surftest SJ-210 also complies with ANSI and VDA standards.

Multilingual support

The display interface supports 16 languages.

Drive unit

The drive unit can be separated from the display unit by using a cable, allowing more flexible measurement. The driver can be separated and reattached in one simple step.

Operation keys

• The keys on the front of the unit and under the sliding cover are well-labeled and easy to use.
• The user-friendly screen layout and arrow keys provide intuitive operability.
• Displayed settings can be changed easily by using the left and right arrow keys. (Patent pending in Japan.)
• Infrequently used keys are hidden under the sliding cover to prevent unintended operations.

Backlight

The backlight improves visibility in dark environments.

Large 2.4-inch LCD

The large LCD provides excellent readability.

Color graphic LCD

Intuitive display that’s clear, sharp, and legible.

Memory card support

The memory card slot lets you store large amounts of data onto a memory card.

Memory card support

The memory card slot lets you store large amounts of data onto a memory card.

Applicable standards

In addition to JIS and ISO, the Surftest SJ-210 also complies with ANSI and VDA standards.

Multilingual support

The display interface supports 16 languages.

Large 2.4-inch LCD

The large LCD provides excellent readability.

Color graphic LCD

Intuitive display that’s clear, sharp, and legible.
Many features in a compact body

Extensive display features that assist measurement

- The highly visible 2.4-inch color graphic LCD with backlight lets you see the screen easily even in dark environments.
- Assessed profiles, load curves, and amplitude distribution curves can be displayed in addition to calculation results. Assessed profiles can also be zoomed up and down.
- Pass/fail results are displayed in color.
- The display mode can be freely switched between portrait and landscape.
- Calculation results are displayed in large characters.

Storage Capacity

<table>

Advanced data storage capabilities

- Up to 10 measurement conditions can be stored in the internal memory. Conditions can be quickly read according to the workpiece.
- An optional memory card can be used as an extended memory to store large quantities of measured profiles and conditions.
- Many interface options:
  - A USB interface is equipped as standard.
  - The Surftest SJ-210 also provides an RS-232C output, Digimatic output, printer output, and footswitch input.
  - Assessed profiles, load curves, and amplitude distribution curves can be displayed in addition to calculation results. Assessed profiles can also be zoomed up and down.
  - The display mode can be freely switched between portrait and landscape.
  - Calculation results are displayed in large characters.

Advanced features

- The multilingual display interface supports 16 languages, which can be freely switched.
- Access to features can be password-protected.
- A quick-charge, long-life battery is provided.
- The display mode can be freely switched between portrait and landscape.
- Calculation results are displayed in large characters.

Stylus alarm function

- An alarm warns you when the cumulative measurement distance exceeds a preset limit. This feature can be used to prevent problems that would be caused by worn out styl. Any value can be specified as the limit.
- Displayed settings can be easily changed by pressing the left and right arrow keys under the sliding cover. For example, these keys can be used to switch the cut-off value (λc) and the number of sampling lengths (N) on the measurement screen.
- The required parameters can be selected from the screen. The sub-menu also lets you specify detailed settings such as the tolerance. After completing measurement, the parameters can be changed and calculation can be executed again* using the new parameters.

*Depending on the measurement conditions.

Ease of setting

- Many interface options:
  - A USB interface is equipped as standard.
  - The Surftest SJ-210 also provides an RS-232C output, Digimatic output, printer output, and footswitch input.
  - Assessed profiles, load curves, and amplitude distribution curves can be displayed in addition to calculation results. Assessed profiles can also be zoomed up and down.
  - The display mode can be freely switched between portrait and landscape.
  - Calculation results are displayed in large characters.

Setting parameters and recalculating results

- The required parameters can be selected from the screen. The sub-menu also lets you specify detailed settings such as the tolerance. After completing measurement, the parameters can be changed and calculation can be executed again* using the new parameters.

*Depending on the measurement conditions.
Battery-powered portability scores when making surface roughness measurements on the shop floor.

Capable of performing measurements in any orientation, including vertical and upside-down. Optional accessories, such as a height gage adapter, allow measurements to be performed efficiently in various situations and setups.

*Refer to pages 8 to 11 for details of the optional accessories available.

A wide variation in system setup is possible with the detector + drive unit + display unit combination.

Highly functional detectors and drive units

The driver can be separated from the display unit and reattached in one easy step.

(Storing drive unit in Display unit)

(Detaching drive unit from Display unit)

Detector supplied as standard

Selectable from the following two items.

- Measuring force: 0.75mN
  - Stylus profile: Tip radius 2µm
  - Tip angle 60°

- Measuring force: 4mN
  - Stylus profile: Tip radius 5µm
  - Tip angle 90°

Drive units

- Standard drive unit
  - Popular standard drive unit.

- Transverse tracing drive unit
  - Best suited for measurement of narrow, shrouded workpiece features such as crankshaft, EDM parts, etc. (Patent Registered in Japan)

- Retractable drive unit
  - The detector is in the retracted position at rest so it is immune from damage when inserted into a feature whose profile cannot be easily seen, such as a blind hole, etc.

Optional detectors

A wide range of optional detectors is available, including detectors for small holes, extra small holes, gear tooth surfaces, and deep grooves.

*See page 8 for details about the Detectors.

Carrying case

A convenient carrying case is supplied as standard for protecting the instrument in the field.

- **Measuring speed**: Measuring: 0.25mm/s, 0.5mm/s, 0.75mm/s; Returning: 1mm/s
- **Measuring force / Stylus tip**: 0.75mN type: 0.75mN / 2µmR 60°, 4mN type: 4mN / 5µmR 90°
- **Skid force**: Less than 400mN
- **Applicable standards**: JIS '82 / JIS '94 / JIS '01 / ISO '97 / ANSI / VDA
- **Assessed profiles**: Primary profile / Roughness profile / DF profile / Roughness profile-Motif
- **Evaluation parameters**: Ra, Rz, Rmax, Rz, Rm, Rmr, Rmr(c), Rsk, Rku, Rp, Rpk, Rvk, M1, M2, A1, A2, V0, Rpm, tp, R, Rx, AR
- **Analysis graphs**: Bearing area curve / Amplitude distribution curve
- **Filters**: Gaussian, 2CR75, PC75
- **Cut off length**: Ac = 0.08, 0.25, 0.8, 2.5mm
- **Sampling length**: As = 2.5, 8µm
- **Number of Sampling lengths (xw)**: x1, x2, x3, x4, x5, x6, x7, x8, x9, x10, arbitrary length (0.3 to 16.0mm: 0.01mm interval)
- **LCD dimensions**: 36.7 × 48.9 mm
- **Display languages**: Japanese, English, German, French, Italian, Spanish, Portuguese, Korean, Traditional Chinese, Simplified Chinese, Czech, Polish, Hungarian, Turkish, Swedish, Dutch
- **Calculation result display**: Vertical display: 1 parameter / 3 parameter / trace to measurements
- **Horizontal display**: 1 parameter / 4 parameter / trace to measurements (Horizontal display is invertable)
- **Printing function**: Measurement conditions / Calculation results / Calculation results for each sampling length / Assessed profile / Bearing area curve / Amplitude distribution curve / Environment setting information
- **External I/O**: USB IF, Digimatic Output, Printer Output, RS-232C IF, Foot SW IF
- **Customization**: Desired parameters can be selected for calculation and display
- **GO/NG judgment**: By max value / 16% / Standard deviation
- **Storage of measurement condition**: Save the conditions at power OFF
- **Storage**: Internal memory: Measurement condition (10 sets), Measured profile (1 set)
- **Memory card (Option)**: 500 measurement profiles, 5000 display images
- **Text file (Measurement conditions / Measured profile / Assessed profile / Bearing area curve / Amplitude distribution curve)**
- **Calibration**: Auto-calibration with the entry of numerical value / Average calibration with multiple measurements (Max.5 times) is available
- **Power-saving function**: Auto-sleep off function (10-600sec)
- **Power supply**: Two-way power supply: battery (rechargeable Ni-MH battery) and AC adapter
- **Power**: *Charging time: about 4 hours (may vary due to ambient temperature)*
- **Endurance**: about 1000 measurements (differs slightly due to use conditions / environment)
- **Size (W×D×H)**: Display unit 52.1 × 65.8 × 160mm
- **Drive unit**: 115 × 23 × 26mm
- **Mass**: About 500g (Display unit + Drive unit + Standard detector)

**Standard accessories**

- 128AA303 Connecting cable
- 178-601 Roughness specimen
- 12BAK699 Carrying case
- 12BAK700 Calibration stage
- Protective sheets for display AC Adapter
- Operation manual
- Quick reference manual
- Warranty

**To denote your AC line voltage add the following suffixes (e.g. 178-560-01A):**

- A for 120V, C for 100V, D for 230V, E for 230V(for UK), DC for 220V(for China), K for 220V(for Korea)
Dimensions: Display Unit and Drive Unit

- Drive unit stored inside display unit (Standard detector installed in drive unit)
- Drive unit not stored inside display unit (Standard detector installed in drive unit)
Dimensions: Detectors

Unit: mm
Optional Accessories: For Drive Unit

Drive unit accessories

Nosepiece for flat surface
No.12AAA217
*Not available for the transverse tracing drive unit.

V-type adapter
No.12AAE644
*Transverse tracing drive unit type standard accessories.
*Dedicated to the transverse tracing drive unit.

Extension rod (50mm)
No.12AAA210
*Not available for the transverse tracing drive unit.

Support feet set
No.12AAA216
*Not attachable to the detector side of the transverse tracing drive unit.

Magnetic stand adapter
No.12AAA221 (ø8mm)
No.12AAA220 (ø9.5mm)

Point-contact adapter
No.12AAE643
*Transverse tracing drive unit type standard accessories.
*Dedicated to the transverse tracing drive unit.

Extension cable (1m)
No.12BAE303
*For connecting between calculation display unit and drive unit.

Vertical positioning adapter
No.12AAA219
*Not available for the transverse tracing drive unit.

Height gage adapter
No.12AAA222 (9 x 9mm)
No.12AAA233 (1/4 in x 1/2 in)

Setting attachments

Setting attachment: V type for measuring in the cylinder axis direction
No.178-033
The V-width is adjustable to the cylinder diameter facilitating axial measurement of a wide range of cylinder diameters.
*Adjustable range: ø5 – 150mm

Setting attachment: Magnetic slider type
No.178-034
The magnet attached to the frame bottom surface allows taking hands-free measurement on the wall.

Setting attachment: Inside diameter type
No.178-035
Greatly facilitates measurement of internal wall surfaces of, for example, a cylinder block.
• Applicable diameter: ø75 – ø95mm
• Accessible depth: 30 – 135mm

Enhances measurement efficiency by facilitating the measurement setup of multiple workpieces of the same type and of the hard-to-access sections of a workpiece.

* Not available for the transverse tracing drive unit
Optional Accessories: For External Equipment

Printer for SJ-210

Assessed profiles and calculation results and curves can be printed out by connecting the SJ-210-dedicated printer, which is palm sized (WxDxH: 93x125x70mm) and can run on an internal battery.

- Power supply can be selected. (AC adapter or battery pack)
- Printable items: Measurement conditions, calculation results, assessed profile, bearing area curve (BAC), amplitude distribution curve (ADC), and environment settings.

Unit configuration:
1. Printer main unit
2. Printing paper 1-pack
3. Battery pack 1piece
4. Exclusive use AC adaptor (with AC power cord) 1piece

The optional Connecting Cable is also required.

Connecting cable for SJ-210 series
No.12AAL067

Example of the connection with SJ-210

Memory card

A memory card for saving 500 measurement conditions, 1000 measured profiles, 500 display images, text file (measurement conditions, measured profiles, assessed profiles, BAC, ADC)

Example of the output by the printer

Printer for SJ-210 supplies

- Standard thermal printing paper (5-pack) No.270732

*Not all memory cards can be recognized. Please use the memory card recommended by Mitutoyo.

No.12AAL069
Optional Accessories: For External Output

Simplified communication program for SURFTEST SJ series

The Surftest SJ-210 has a USB interface, enabling data to be transferred to spreadsheet or other software. We also provide a program that lets you create inspection record tables using a Microsoft Excel* macro.

Required environment*:
- OS: Windows 2000 SP4
  Windows XP
  Windows Vista
  Windows 7
- Spreadsheet software:
  Microsoft Excel 2000
  Microsoft Excel 2002
  Microsoft Excel 2007

*Windows OS and Microsoft Excel are products of Microsoft Corporation.

The optional USB cable is also required.
- USB cable for SJ-210 series (2m)
  No.12AAL068

This program can be downloaded for free from the Mitutoyo website.
http://www.mitutoyo.co.jp

Footswitch

A footswitch is used to trigger measurement. This tool is very useful in cases where you need to measure the same workpiece multiple times using jigs and other fixtures.

No.12AAJ088

Input Tool: Calculation results input unit

Surftest SJ-210 calculation results can be loaded directly into commercial spreadsheet software via this unit simply by connecting it to the USB connector on a computer or a PS/2 type keyboard connector.

USB keyboard signal conversion model
IT-012U  No.264-012-10
PS/2 keyboard signal conversion model
IT-005D  No.264-005

Protective sheets for the display

Protective sheet for the color LCD (5 sets)
No.12AAL066
Whatever your challenges are, Mitutoyo supports you from start to finish.

Mitutoyo is not only a manufacturer of top quality measuring products but one that also offers qualified support for the lifetime of the equipment, backed up by comprehensive services that ensure your staff can make the very best use of the investment.

Apart from the basics of calibration and repair, Mitutoyo offers product and metrology training, as well as IT support for the sophisticated software used in modern measuring technology. We can also design, build, test and deliver bespoke measuring solutions and even, if deemed cost-effective, take your critical measurement challenges in-house on a sub-contract basis.

Note: Product illustrations are without obligation. Product descriptions, in particular any and all technical specifications, are only binding when explicitly agreed upon.

MITUTOYO and MiCAT are either registered trademarks or trademarks of Mitutoyo Corp. in Japan and/or other countries/regions. Other product, company and brand names mentioned herein are for identification purposes only and may be the trademarks of their respective holders.
