

Measuring Solution for Lathe Machining

After Lathe machining, how do you measure?
Mitutoyo has solutions!

Roundness Testing Machine

Roughness Testing Machine

Contour Machine

Profile Projector

Instruments for Simple Measurement

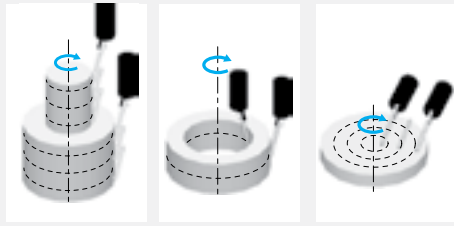

Various measurement can be easily inspected after machining and create inspection report!

Scan QR Code for more informations

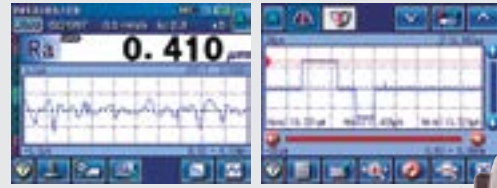

Roundness RA-120

- Easy to inspect circularity, cylindricity, axial misalignment
- Hard to measure flatness measurement is possible

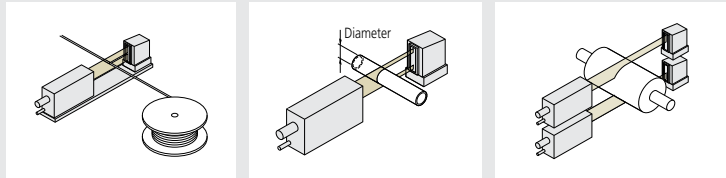

Roughness SJ-210, SJ-310, SJ-410

- Instance result to determine the roughness of the processed surface
- Instance result with One click

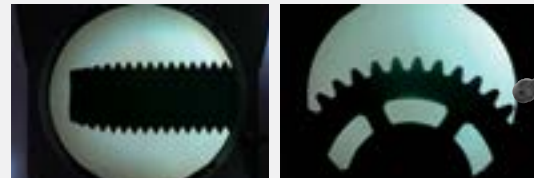

Laser Scan Micrometer (LSM)

- Easy and non contact measurement for instance result by placing work piece in LSM
- No measurement skills required

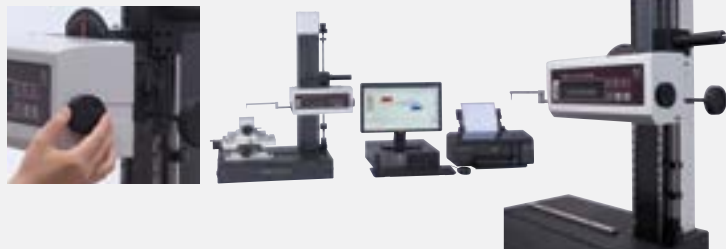

Profile Projector PJ, PV, PH

- Large workpieces can easily be measured
- Projector light and enlarge image reduce stress to the eye
- Reduce measurement time

Contour CV-2100

- Instance result with One click
- Consistent measurement result for different user
- Easy to understand measurement result through the output graph
- Able to compare measurement result with 2D CAD

Small Tools / Data Management

- Digimatic output for instance result
- Creating inspection report by outputting to the PC
- Minimize human error
